

OBIEE 12c Bootcamp

Course Overview

Looking for intensive training covering everything you need to know about OBIEE 12c?

Then it's time to go to boot camp. We'll start by giving you an overview of this comprehensive tool. Then we'll dive into..

- Creating dashboards
- Creating analysis
- RPD Modeling
- Upgrading from 11g to 12c

On the second day, you'll learn about basic reporting, including creation of dashboards and analysis as well as utilizing OBIEE's new Visualizer Analyzer tool. As we go deeper into the training, you'll gain an understanding of the RPD, learning how to create an RPD layer against transactional and data warehouse databases.

In just five days, you'll become an expert OBIEE user who knows all the tool's ins and outs.

Who Should Attend?

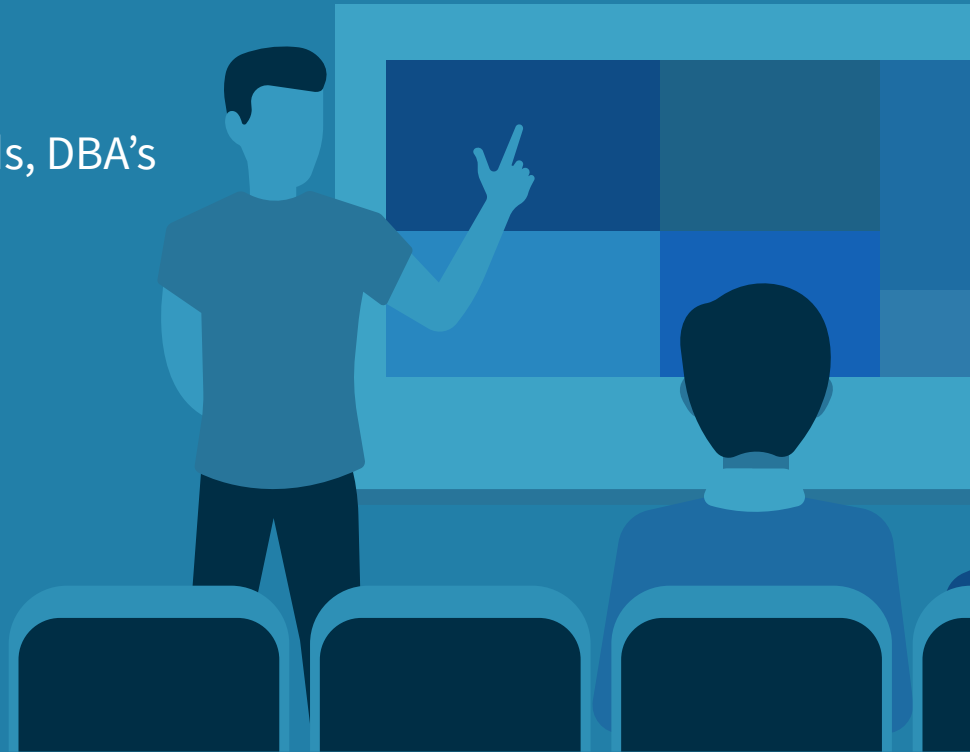

Developers, Consultants,
Project Managers, Tech Leads, DBA's

Previous Knowledge

None Required

Duration

5 Days

Course Agenda

Day 1

Overview & New Features

- Product Overview
- Key Components
- Product Demo
- Dataset Overview

Creative Analyses

- Global Variables
- Analysis Prompts
- Filtering Data
- Hierarchical Columns
- Choosing the Right Visualization
- Conditional Formatting
- Dashboard Overview
- Web Catalog
- Creating Analyses Using Answers
- Creating Reusable Calculations

Course Agenda

Day 2

Creating Dashboards

- Create Dashboards
- Dashboard Prompts
- Dashboards & Analyses Interaction
- Presentation Variables

Actionable Intelligence

- What It Is
- Type of Actions
- Navigation Actions
- Action Links
- Agents & Alerts
- Conditions

Creating Analyses

- Visual Analyzer
- BI Ask
- Data Mashups

Day 3

Introduction to RPD Modeling

- Physical Layer
- Aliases
- Business Layer
- Facts & Dimensions
- Logical Table Source
- Hierarchies (Including Parent-child, Ragged, and Skip-level)
- Basic Calculations
- Presentation Layer
- Offline / Online Development

Day 4

Advanced RPD Modeling

- Time-series Calculations
- Horizontal & Vertical Federation
- Fragmentation
- Server Variables
- Row-level Security

Course Agenda

Day 5

Architecture & Installation

- Architecture
- Changes to the Architecture & Director Structure
- Installation Process
- Upgrading from 11g

Security

- WebLogic Users & Groups
- WebLogic Providers
- OEM Roles & Policies
- Presentation Services Administration
- Catalog Security
- Presentation Layer Security

System Management

- Overview of System Administration
- Starting/Stopping Services
- Deployments & Environment Migration
- Baseline Validation Tool
- Basic Monitoring
- Usage Tracking
- Query Caching
