

ODI for BI Applications

Course Overview

This course is for ODI 11g developers and operators who are looking to expand their knowledge in the context of Oracle BI Applications. During the training, our experts will not only show you “how,” but explain “why.”

In three days, you’ll learn how to work in ODI Studio, as well as navigate Configuration Manager and Functional Setup Manager. This course has been developed for Oracle BI Applications 11.1.1.9 , but is relevant if your organization is on an earlier release of Oracle BI Applications 11g.

Who Should Attend?

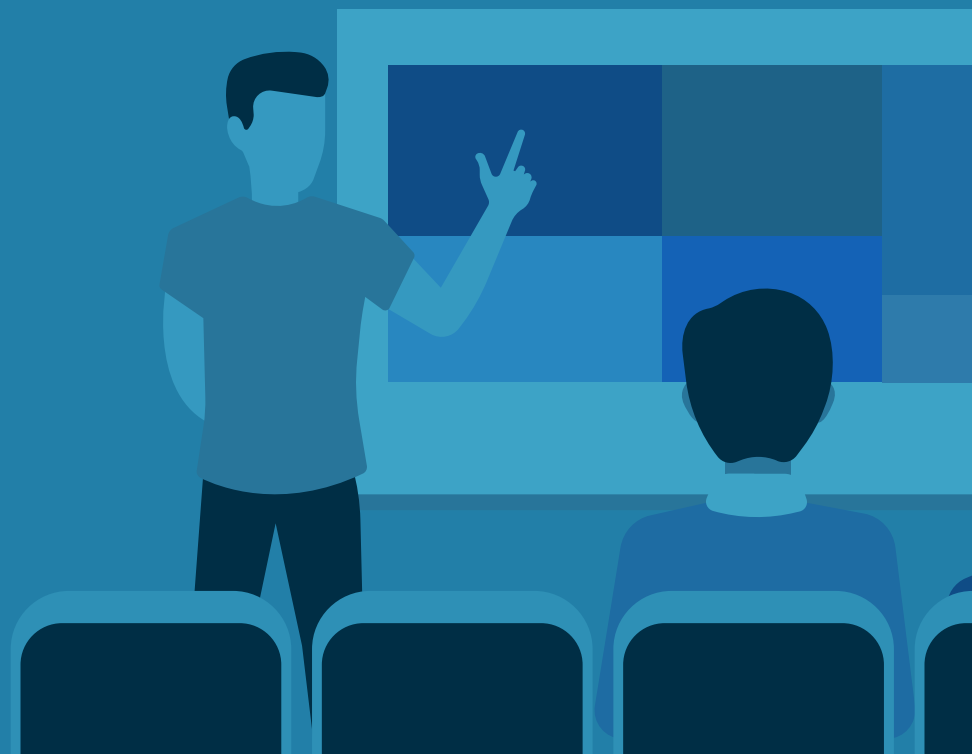

Developers, Tech Leads

Previous Knowledge

Some Experience Preferred
